# Get Out & Dive In

*outdoor living spaces to love*

*The chill is gone and the grill is on. It's time to showcase your great outdoors for family, friends and neighbors. Just in case you need some ideas for getting that deck in tip-top shape, adding some new features or even accessorizing, we asked several experts to show us their pool and patio projects.*

## A Grand Design Built Around the Views

This spectacular custom lakefront home is near downtown Orlando. The homeowners dreamed of a new, traditional home that would be luxurious, family-friendly and bring the outdoors in. They called on the expertise of custom builder and remodeler Victor Farina of Farina and Sons, who had renovated their previous home. Together, Victor and his team collaborated with his clients to bring their dream to reality.

Showcasing the lake and pool drove the design and selections. Natural colors and materials are incorporated throughout, including travertine and stone around the patio and pool. Sculptured iron railings and travertine insets are featured on the staircase for safety and aesthetics. The handcrafted cypress pergola enhances the space beautifully. And lush tropical landscaping complements the elevated pool deck and lanai in this striking home.

It is also full of conveniences and amenities including the custom salt system pool and self-cleaning hot tub with a Pebble tec surface, custom tile and fountain. A summer kitchen is perfect for outdoor entertaining and the innovative retractable screens offer privacy and protection. Visit [farinaandsons.com](http://farinaandsons.com) to see more ideas.
